

International Journal of Modeling and Optimization

CONTENTS

Volume 14, Number 3, 2024

- Improvement of Motion Accuracy for Compact Size Five-Axis-Controlled Machine Tool with a Wave Motion Gear Device Considering Warming-up Operation 94
Fuka Hashiba, Eiichi Aoyama, and Toshiki Hirogaki*
- Topological Optimization of a Polyfunctional End-Effector Used in Palletizing Applications 100
Mihai Costea and Gheorghe-Gabriel Jiga*
- Thermal Modeling Analysis and Validation of Drilling Manufacturing Process for Aero-Engine Turbine Blades 104
Chau-Chung Song, Jian-Hong He, and Cheng-Hua Wu*
- Functional Optimization of An Air-Car by Modeling and Simulation 112
Mihai Agud, Stefan Velicu, Florin Enache, Mihai Stelian Hagiescu, and Cristian Paunescu*
- Mechanization of a Robust Navigation Scheme for Land Applications Employing GNSS/INS Augmented with Zero Velocity Update 116
Muhammad Ushaq, Merium F. Abbasi, and Muhammad R. U. B. Mirza*
